

## Responsible Care Beijing Manifesto

Association of International Chemical Manufacturers

AICM represents a broad range of international chemical manufacturers from around the globe with a common mission to contribute to the development of a harmonious society and the sustainable growth of China's chemical industry through the promotion of Responsible Care and cost-effective, science- and risk-based policies. With an aim to fuel the efforts in fulfilling this mission, and by declaring the following manifesto, AICM joins with the following member companies to demonstrate a public commitment to the implementation of Responsible Care in China.

AICM and the following signatory member companies commit to the advocacy and practice of Responsible Care in China which is known as the chemical industry's global voluntary initiative, and strive to work together to continuously improve our health, safety and environmental performance, and to communicate with stakeholders about our products and processes with due care for sustainable development and growth.

AICM and the following signatory member companies commit to operate safely and eco-friendly and towards an open, honest and transparent manner with our stakeholders, from local communities to local authorities and government, from the media to the general public, through the sharing of information, the promotion of rigorous EH&S management systems, performance indicators and verification procedures and the pursuit of dialogue and partnerships with stakeholders in China.

AICM and the following signatory member companies commit to work hand in hand with Chinese chemical industry associations and companies to share Responsible Care best practices which can transcend differences in culture, national legislation and industry environment, with plans to spread the implementation of Responsible Care as broadly as possible within the chemical and allied industries, and throughout the related supply chain in China.

AICM and the following signatory member companies commit ourselves to be a source of industrial solutions to some of society's most important challenges. We seek to be a major contributor for economic, social and environmental development of China, and to be a primary conduit for cost-effective, science- and risk-based policies, standards, laws, regulations and responsible enforcement and compliance practices, so as to contribute to achieving energy and resource conservation, emission and pollution reduction, sustainable development, and a society of harmony and innovation in China.

AICM and the following signatory member companies advocate for joint responsibilities with domestic chemical industry players and targeted media to achieve a responsible chemical industry image and reputation in China.
