

FUNDAMENTALS OF DRY MIX MORTARS

Aims

The three-day seminar on VINNAPAS® dispersible polymer powders and dispersions is a successful mixture of theoretical and practical exercises in our applications lab. It ensures that you gain varied and interesting insights into the world of dry mix mortar, extending from raw materials, additives to dry mix mortar products and requirement, formulation and test of dry mortar are also referred.

Target Group

Technical managers, R&D managers or Engineers need to aware of basic knowledge in construction chemistry

Contents

- Function and mechanism of hydraulic binders
- Theory and effects of dispersions and polymer powders
- Functions of additives in dry mix mortar
- Theoretical introduction to the main fields of application (tile adhesives, tile grouts, skim coats, external thermal insulation composite systems)
- Discussion on guideline formulations
- Key tests and standards (in the lab)
- Develop formulations and lab trial (in the lab)

Instructors

The members of our WACKER ACADEMY trainer team are Technical Service Managers who collected specific knowledge and extensive experience during their long lasting work at WACKER.

From their start of the career they have been involved with training and educational activities as well as training norms and guidelines.

Our lab trainers, who are responsible for the practical side of our seminars, have also large experience in developing formulations and test procedures.

Our whole team is working to completely fulfill your expectations and is eager to answer all your individual questions and concerns.

Requirements

Basic knowledge of Chemistry

Dates

Current dates can be found on our website!

Duration

3 days

Location

**WACKER ACADEMY,
Beijing, China**

Fees

Charges applicable

Number of Participants

10~18
