

SPECIAL APPLICATIONS OF DRY MIX MORTARS

Our expertise

Besides the traditional dry mix mortar applications like Ceramic Tile Adhesives (CTA), External Insulation and Finishing Systems (EIFS) and skim coats. Dry mix mortars can be used in various application fields with special properties and requirements. This seminar widens the view of some special applications of dry mix mortars, which may enable your company to create high added value in the dry mix mortar market. The methods and techniques to develop the formulations for these special products will be also delivered.

Training concept

During the two-day seminar, we will interpret the self-leveling compounds, repair mortars and sealing slurries, referring to the developing skills of products, basic requirements and the application status in the market in detail. The methods of adjusting the formulation and application will be demonstrated in the lab.

Content

- Overview of the main products in the international market
- Current market trends in the world and China
- Theoretical introduction of some special applications like self-leveling, repair mortars and sealing slurries
- Discussion on guide formulations
- Functions of various materials and additives
- Lab trials and formulation development under instruction

Participants

Technical managers and R&D managers with basic knowledge in construction chemistry

Benefits

- Market information for various dry mix products
- Practical training in lab with excellent facilities
- Market trends on the global developments and lively discussion
- Visit our technical center in Beijing

Your trainers

The members of our WACKER ACADEMY trainer team are Technical Service Managers who collected specific knowledge and extensive experience during their long lasting work at WACKER.

From their start of the career they have been involved with training and educational activities as well as training norms and guidelines.

Our lab trainers, who are responsible for the practical side of our seminars, have also large experience in developing formulations and test procedures.

Our whole team is working to completely fulfill your expectations and is eager to answer all your individual questions and concerns.

Venue

WACKER ACADEMY, Beijing, China
