

Automatic processes that save money. This is something that is taken for granted in production-related processes. For administrative work, however, the full potential has yet to be realized. WACKER developed e-solutions specifically to provide services to simplify procurement processes, optimize communications in many areas, and offer customers effective new alternatives.

Login4more is a solution that benefits all WACKER customers. The online service portal and the WACKER online shop greatly enhance efficiency. Like all WACKER e-solutions, Login4more has been designed to meet our customers' specific needs.

#### Fewer Errors

The traditional way of placing and processing an order has many pitfalls: from typographic errors to illegible faxes to misunderstood instructions by phone. WACKER e-solutions are faster, more secure and provide a clear overview.

#### Relief – right where you need it

E-solutions provide support exactly where human errors are most common. However, they supplement rather than replace human interactions, by bringing the right people together.

#### Greater efficiency

Our service portal automatically simplifies your operations by providing clearly-organized access to all the key information in one place.
