

SILICONES IN MASONRY PROTECTION

Our expertise

WACKER is a leading global silicone producer and has a strong and extensive product portfolio to meet your individual needs in masonry protection. Our development activities focus systematically on future-oriented applications and our customers' needs in the following fields: silicone resin emulsion paints, impregnation of mineral substrates and in-plant impregnation of construction materials. Chemical background knowledge about our SILRES® products helps you to achieve a better understanding and enables further improvements of your products. Guide formulations help you find new ideas for your business.

Training concept

The two-day seminar about Silicones in Masonry Protection contains a good mixture of presentations and practical training. It guarantees you an interesting and diversified insight into the world of silicones and their advantages and application for treatment and preservation of all important building materials

Content

- Introduction to Silicone Chemistry
- Significance and mode of action of Silicones in the Construction Industry
- Main application fields (silicone resin emulsion paint, impregnation of mineral substrates and in-plant impregnation of construction materials)
- Key tests and standards
- Discussion on guideline formulations
- Carrying out tests in the labs

Participants

Technical and R&D staffs (with basic chemical knowledge)

Benefits

By the end of the seminar, the participants will:

- equip the know-how knowledge on the use of silicones as masonry protection agents.
- be able to conduct their own tests to quantify the performance of the masonry protection agents.

Your trainers

The members of our WACKER ACADEMY trainer team are Technical Service Managers and Specialists who collected specific knowledge and extensive experience during their tenure with WACKER.

At WACKER they have been involved with trainings and educational activities as well as training norms and guidelines. They have also large experience in developing formulations and test procedures.

Our entire team is working to completely fulfill your expectations and is eager to answer all your individual questions and concerns.

Venue

WACKER ACADEMY, Singapore
