

DRY-MIX MORTAR APPLICATIONS MODIFIED WITH VINNAPAS® – STANDARD TESTING METHODS

Aims

The seminar on testing dry mix mortars according to various international standards like EN, DIN, ISO and ASTM is a mixture of theoretical presentations and a practical training in our application laboratory. It guarantees you an interesting and diversified insight in preconditions for correct and reliable testing, like laboratory conditions, testing equipment and quality management.

Target Group

Technical managers and laboratory managers, chemists, builders and developers, applicators, formulators

Contents

- Design of appropriate laboratory facility
- Testing equipment: design, maintenance, calibration
- Correct sampling
- Theoretical introduction into key tests and standards for cementitious tile adhesives, self leveling flooring compounds, external thermal insulation composite systems and mineral renders and plasters
- Presentation of the quality critical parameters of the tests
- Discussion of the various international standards
- Practical presentation and discussions of tests in the laboratory

Instructors

The members of our WACKER ACADEMY trainer team are Technical Service Managers who collected specific knowledge and extensive experience during their long lasting work at WACKER.

From their start of the career they have been involved with training and educational activities as well as training norms and guidelines.

Our lab trainers, who are responsible for the practical side of our seminars, have also large experience in developing formulations and test procedures.

Our whole team is working to completely fulfill your expectations and is eager to answer all your individual questions and concerns.
