

SAVING ENERGY – POLYMER BINDERS IN INSULATION

Aims

During the one-day intensive seminar, you will learn about the individual components of the ETIC system and the advantage of using polymer binders for this application. You will also be informed about current market trends, potential savings and the European standards and codes of practice. We will demonstrate how to install these systems. You are welcome to try it yourself.

Target Group

Architects, civil contractors, builders and developers (chemical background not required), any party interested in Green Building technology, energy consultants.

Contents

- The facade – an important energy-saving part of the building
- Importance of insulation, especially external insulation
- Role of ETICS for energy saving
- System components and installation
- Polymer binders and their importance for ETICS
- Requirements and standards
- Practical work with a complete ETICS system

Instructors

The members of our WACKER ACADEMY trainer team are Technical Service Managers who collected specific knowledge and extensive experience during their long lasting work at WACKER.

From their start of the career they have been involved with training and educational activities as well as training norms and guidelines.

Our lab trainers, who are responsible for the practical side of our seminars, have also large experience in developing formulations and test procedures.

Our whole team is working to completely fulfill your expectations and is eager to answer all your individual questions and concerns.
