

LABORATORY COURSE: FUNDAMENTALS OF DRY MIX MORTARS

Our expertise

The process of development of dry mix mortars and carrying out of quality control tests demands a specific knowledge and education from the laborant. In the meantime we can see more and more of contemporary lab-equipment, which allows to perform tests in an automatic mode and gather exact and reliable data, saving a lot of time. Attendees of this seminar will get an useful practical experience in modern dry-mix mortar lab. WACKER Moscow technical center has opened in 2003 and is equipped with all necessary tools and machines for testing all kinds of dry mix mortars.

Training concept

During the one-day intensive seminar, you will learn about the different methods for providing quality control tests of dry mix mortars and role of polymer binders in this application. You will also be informed about current eco labels and European standards. We will be demonstrating how to formulate the compounds correctly and how to work on necessary equipment.

Content

- Overview of different test methods for Cementitious Tile Adhesives (EN, DIN)
- Overview of different test methods for Self-Leveling Underlayments (EN, DIN)
- Overview of different test methods for external thermal insulation composite systems (EN, DIN, ETAG)
- Overview of different test methods for renders and plasters (EN, DIN)
- Overview of different test methods for repair mortars and sealant slurries (EN, DIN, ETAG)

Participants

Technical managers, R&D managers, Lab assistants

Benefits

- Practical training in the Technical Centre WACKER
- Customer's materials can be used during the training
- Lively discussions on trends and global developments

Your trainers

The members of our WACKER ACADEMY trainer team are Technical Service Managers who collected specific knowledge and extensive experience during their long lasting work at WACKER.

From their start of the career they have been involved with training and educational activities as well as training norms and guidelines.

Our lab trainers, who are responsible for the practical side of our seminars, have also large experience in developing formulations and test procedures.

Our whole team is working to completely fulfill your expectations and is eager to answer all your individual questions and concerns.

Venue

WACKER ACADEMY, Moscow/Russia
