

EXPERIENCED MASONRY PROTECTION WITH SREP®

Our expertise

WACKER as your raw material supplier contributes a lot to the value of your products. Therefore, it is important for you to know how WACKER and its organization can be your partner in providing the right solution. The chemical background of SILRES® helps you to understand how you can improve the performance of your products. Basic formulations help you to find new ideas for your business.

Training concept

The one-day seminar about SILRES® building protection agents is a good mixture of presentations and practical training in our lab. It guarantees you an interesting overview of silicone bases coatings, its benefits and its application for treatment and preservation of facades.

Content

- Introduction to silicone chemistry
- Overview of different facade coating systems
- Mode of action of silicone based primers, paints and plasters
- Important test methods and standards
- Explanation of different coating formulations
- Practical tests in the lab

Participants

Architects, engineers, conservators, paint manufacturer

Benefits

- Market-oriented information about silicones as building protection agents
- Practical training in a state-of-the-art lab
- Knowledge about market trends and needs

Your trainers

The members of our WACKER ACADEMY trainer team are Technical Service Managers who collected specific knowledge and extensive experience during their long lasting work at WACKER.

From their start of the career they have been involved with training and educational activities as well as training norms and guidelines.

Our lab trainers, who are responsible for the practical side of our seminars, have also large experience in developing formulations and test procedures.

Our whole team is working to completely fulfill your expectations and is eager to answer all your individual questions and concerns.

Venue

WACKER ACADEMY, Moscow/Russia
