

SILANES FOR CONCRETE PROTECTION

Our expertise

WACKER as your raw material supplier contributes a lot to the value of your products. Therefore, it is important for you to know how WACKER and its organization can be your partner in providing the right solution. The chemical background of SILRAS® helps you to understand how you can improve the performance of your products. Basic formulations help you to find new ideas for your business.

Training concept

The one-day seminar about SILRES® impregnating agents for concrete is a good mixture of theoretical presentations and practical training in our lab. You will gain an overview of processes to prevent moisture from penetrating in buildings. Our ambition is that you get a general idea of the silane technology helping to preserve concrete structure and its benefits.

Content

- Reason for concrete damages
- Concrete: building material of the future
- Theoretical introduction to the silane technology
- Important tests and standards
- Carrying out tests in the lab

Participants

Technical managers and R&D managers, architects, specification engineers, civil engineers

Benefits

- Market-oriented information about silanes as building protection agents
- Practical training in a state-of-the-art lab
- Discussion about developments and trends

Your trainers

The members of our WACKER ACADEMY trainer team are Technical Service Managers who collected specific knowledge and extensive experience during their long lasting work at WACKER.

From their start of the career they have been involved with training and educational activities as well as training norms and guidelines.

Our lab trainers, who are responsible for the practical side of our seminars, have also large experience in developing formulations and test procedures.

Our whole team is working to completely fulfill your expectations and is eager to answer all your individual questions and concerns.

Venue

WACKER ACADEMY, Moscow/Russia
