

RELIABLE, LASTING PROTECTION FOR BUILDING FABRIC

Capitalizing on the sustainability trend in building. Silicone masonry protection agents for preserving important construction materials. 2-day fundamentals seminar.

Aims

A practical introduction to silicone chemistry shows how you can use the technical and economic potential of silicones in construction.

Target Group

Technical managers, R&D, sales

Contents

Day 1

Theory:

- Introduction to silicone chemistry
- Decorative coatings
- Water-repellent impregnation of insulating materials
- Colorless coating systems

Practice:

- Plant tour and practical examples

Day 2

Theory:

- Silanes for concrete protection
- Other applications in the field of masonry protection

Practical work:

- Lab training on decorative coatings and water-repellent impregnants

Instructors

Anoop D' Souza

Requirements

Basic knowledge of chemistry

Dates

Upon request

Duration

2 days

Location

**WACKER ACADEMY,
Dubai/UAE**

Fees

USD 500

Number of participants

4 – 50
