

FLOORING SYSTEMS

Improving the handling and quality of self-leveling flooring compounds.
1-day intensive seminar

Aims

You will obtain theoretical and practical knowledge about how quality, formulation costs and reliability in application can be kept in balance by using polymer binders.

Target Group

Architects, specification engineers, municipality engineers

Contents

- Overview of different self-leveling flooring compound (SLC) systems
- Requirements on modern SLCs – eco labels and European standards
- Information on latest test methods
- Discussion on trends and global developments

Instructors

Mohammed Sanaobar

Requirements

No requirements needed

Dates

Upon request (English or Arabic)

Duration

1 day

Location

**WACKER ACADEMY,
Dubai/UAE**

Fees

USD 600

Number of Participants

4 – 50
