

ENVIRONMENTAL POLICY

Wacker Chemical Corporation is committed to the protection of the environment and to the health and safety of our employees and our community. This commitment is based on the Responsible Care® Management System principles:

PROMOTE prevention of pollution through environmentally compatible production processes, waste minimization initiatives, recycling, and the conservation of resources.

PURSUE continuous improvement by ensuring that environmental protection is intrinsic to the research and development, production, application, and distribution of our products.

COMPLY with all relevant environmental laws, regulations and other requirements, and engages in voluntary pollution reduction programs.

ENSURE that employees are properly informed and continually trained in environmental awareness and encourages employees to help improve safety and environmental practices.

RECOGNIZE the importance of communicating, and taking actions, with the public and our customers regarding the environment and public health and safety, and about the safe use of our products.
