

## QUICK GUIDE

### HowTo configure your new Multi Factor Authentication

**Please note:** This instruction has **two columns** – some steps have to be done on your **Smartphone** (left column) and some steps on your **PC/Notebook** (right column).

#### Smartphone

- 1 Please install the App „NetIQ Advanced Authentication“

Instructions for Wacker [iPhone](#), [Samsung](#) or [Samsung in China](#)

non Wacker Smartphones  
Please use the App or Playstore on your device.

- 2 Open the app, agree to the licence agreement and configure a at least 4 digit PIN. Later, you can secure the app by fingerprint as well.

Please allow the app to use camera and location resources of your phone.

#### PC/Notebook

- 3 Open this URL in your Browser:  
<https://mfauth.idm.wacker.com>  
and login with your Wacker Useraccount and Password (without a repository prefix)

User name

Method  Windows password

Password

**Smartphone****5**

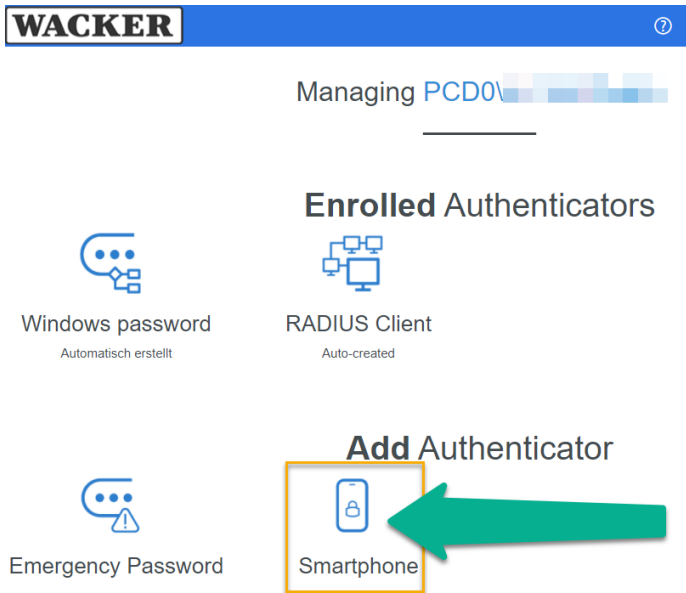

Press the „+“ Button in the app

If prompted, please allow the app the usage of the camera

**PC/Notebook****4**

Klick on „Smartphone“

and on „Save“ on the next dialog to start the configuration.

**6**

... to take a picture of the displayed QR-Code with your App

## Am Smartphone

**Tip:** You can define additional information about the authenticator in your app. This is optional

**7** You have successfully finished the configuration of your app. It should now look like this:

## Am PC/Notebook

The webpage in your browser will change accordingly

**Add Authenticator**

→ you can now close the browser window

The App creates a new 6-digit One Time Password (OTP) every 30 Seconds which is used for authentication with Citrix Access Gateway or VPN.

Please save the link to this instruction for later use. You will need it again if you get a new smartphone.

If your device is lost or stolen, please inform the Wacker User Helpdesk immediately.
