

PRESS RELEASE

Number 57

WACKER to Raise Prices for Silicones and Pyrogenic Silica

Munich, October 4, 2017 – As of November 1, WACKER, the Munich-based chemical group, is raising its prices for silicone polymers, silicone fluids and silicones from downstream production stages. WACKER's pyrogenic silica HDK® will also be affected. Depending on product family, region and business field, the price increase will range up to 25 percent, if permitted by existing customer contracts. This measure is necessitated by rising production expenses due to increasing raw-material and energy costs.

These price adjustments ensure that the WACKER SILICONES business division continues to provide outstanding service and technical support along with consistently high product quality and technological innovations for its customers.

About WACKER SILICONES

WACKER SILICONES is one of the largest silicone manufacturers worldwide with over 3,000 highly specialized and innovative products. The division's portfolio ranges from silicone fluids, emulsions, resins, elastomers and sealants to silanes, silane-terminated polymers and pyrogenic silica. These stand out due to their significant value-adding potential – enhancing both the benefits and performance of customers' end products. WACKER SILICONES' products find application in such sectors as automotive engineering, construction,

chemicals, cosmetics, medical technology, energy & electronics and paper & textiles.

The company in brief:

WACKER is a globally-active chemical company with some 13,450 employees and annual sales of around €4.6 billion (2016, excluding Siltronic). WACKER has a global network of 23 production sites, 19 technical competence centers and 49 sales offices.

WACKER SILICONES

Silicone fluids, emulsions, rubber grades and resins; silanes; pyrogenic silicas; thermoplastic silicone elastomers

WACKER POLYMERS

Polyvinyl acetates and vinyl acetate copolymers and terpolymers in the form of dispersible polymer powders, dispersions, solid resins and solutions

WACKER BIOSOLUTIONS

Biotech products such as cyclodextrins, cysteine and biologics, as well as fine chemicals and PVAc solid resins

WACKER POLYSILICON

Polysilicon for the semiconductor and photovoltaic industries
