

Automation offers significant savings potential, especially in inventory management. The VMI system from WACKER helps you to use this potential.

Your advantages at a glance:

- Optimized inventory
- Faster throughput
- Streamlined order processing
- Fewer error sources
- Maximum visibility
- High flexibility

Reap the benefits. Talk to us.
We will gladly assist you!

The data presented in this brochure are in accordance with the present state of our knowledge, but do not absolve the user from carefully checking all supplies immediately upon receipt. We reserve the right to alter product constants within the scope of technical progress or new developments. The information given in this brochure should be checked by preliminary trials because of conditions during processing over which we have no control, especially where other companies' raw materials are also being used. The information provided by us does not absolve the user from the obligation of investigating the possibility of infringement of third parties' rights and, if necessary, clarifying the position. Recommendations for use do not constitute a warranty, either express or implied, of the fitness or suitability of the product for a particular purpose.

THE INTELLIGENT VMI
SOLUTION.

CREATING TOMORROW'S SOLUTIONS

VENDOR MANAGED INVENTORY FROM WACKER: VMI AT ITS BEST.

AUTOMATED. INTEGRATED. OPTIMIZED.

**AUTOMATE YOUR INVENTORY MANAGEMENT.
REDUCE YOUR COSTS.**

Vendor managed inventory is a service provided by WACKER for managing your inventory levels and warehousing costs. It consists of individually agreed, automated processes for enabling WACKER to independently replenish your stocks as needed. The outcome is reliable, error-free, just-in-time delivery, coupled with optimized throughput times and lower administrative costs.

Lower costs.

Full control.

The fully automated WACKER system checks your stock levels at agreed intervals. If it finds that an item needs to be replenished, it generates an order in WACKER's SAP system. Quickly, reliably, and securely. But it also informs you in real time about each process as it happens, so that you can always intervene to make adjustments.

Optimal inventory levels.

Minimal error sources.

VMI from WACKER ensures that agreed stock levels are always maintained.

You can therefore carry less inventory, without jeopardizing complex express deliveries, for example. Not only do you save on the cost of maintaining high stock levels, but you also streamline ordering procedures, shorten order-processing times, and eliminate human data-entry errors.

100% transparency.

At the click of a button.

All key data are visible to any authorized person via secure on-line access. You are always in the know – from product name to current stock levels, agreed minimum stock and replenishment levels through to triggered orders, order status, order history and notified delivery dates.
