

The data presented in this brochure are in accordance with the present state of our knowledge, but do not absolve the user from carefully checking all supplies immediately upon receipt. We reserve the right to alter product constants within the scope of technical progress or new developments. The information given in this brochure should be checked by preliminary trials because of conditions during processing over which we have no control, especially where other companies' raw materials are also being used. The information provided by us does not absolve the user from the obligation of investigating the possibility of infringement of third parties' rights and, if necessary, clarifying the position. Recommendations for use do not constitute a warranty, either express or implied, of the fitness or suitability of the product for a particular purpose.

EFFICIENT
ORDER PROCESSING,
WITH INTEGRATED
SYSTEM SOLUTIONS.

CREATING TOMORROW'S SOLUTIONS

ELEMICA: PROCESS QUALITY IN GOOD HANDS.

CLOSER TO YOU.
AT THE HIGHEST LEVEL.

For order processing, WACKER relies on ELEMICA – the chemical industry's transaction network. As an independent provider, ELEMICA handles the electronic data interchange and acts as a translator between different systems. This ensures that the electronic communication between the participating partners flows as smoothly as possible.

Problem-free processing.

As a result of clean data.

Automated processes increase efficiency: no time-consuming printing and scanning of documents, no illegible faxes, no duplicate orders or ensuing problems. This saves time and money, while promoting communication.

High flexibility.

Thanks to maximum availability.

Whenever you place your order: ELEMICA makes sure that it is delivered with speed and certainty – around the clock, seven days a week. No document gets caught up or lost. In addition, all information is immediately available where it is needed – during vacation and sickness coverage as well. Thus, you are always up-to-date and can react flexibly.

Optimum results.

Just the way you need them.

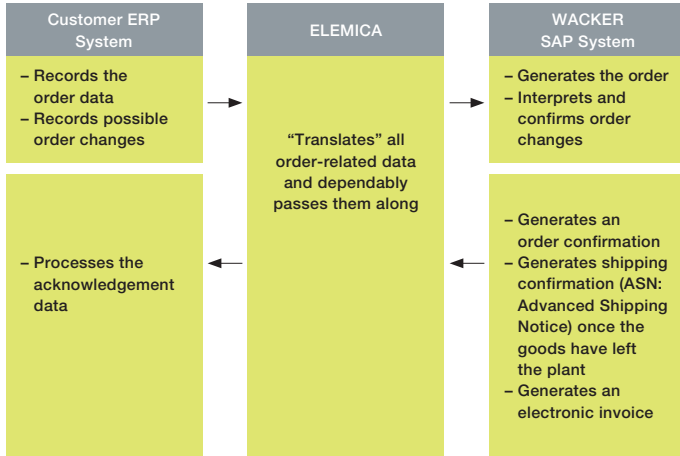

Customized solutions, that can be tailored to your needs and seamlessly integrated into your processes, offer you the greatest utility. This applies whether you want to automate your entire order process or just order placement, for example, or simply transmit data to WACKER from your existing EDI solution. It isn't absolutely necessary to be an ELEMICA member in order to benefit from its fully-automated processing; you can continue using your current ERP (Enterprise Resource Planning) system.

A single interface.

Best connections.

With an ELEMICA interface, you can exploit the potential offered by electronic communication. You have a good connection not only to WACKER, but to all other ELEMICA member-companies and those of linked networks (e.g. Hub2Hub).

ELEMICA FULL CONNECTION. A GOOD MUTUAL LINK.

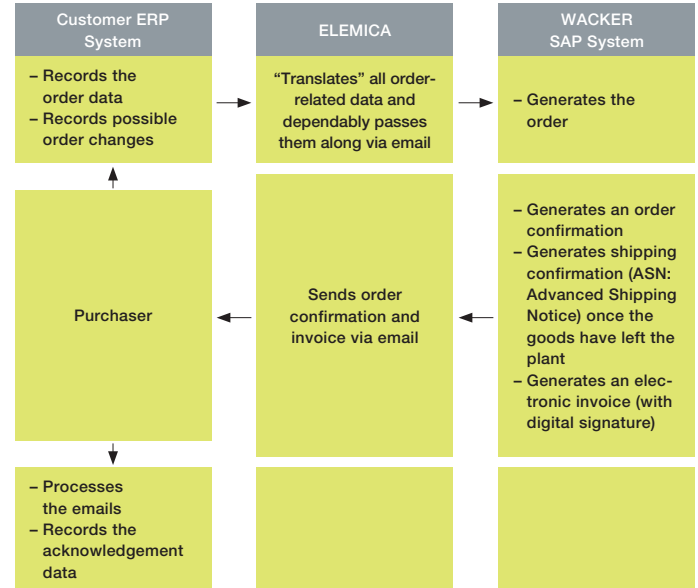

As an ELEMICA member, all of the advantages of fully-automated order processing are offered to you by the “Full Connection” communications solution. You reap benefits throughout – from order placement to invoicing.

Full integration on both ends. Unbeatable efficiency. Your ERP system and WACKER’s SAP system communicate directly, automatically exchanging order data – without delay and without manual intervention, thanks to full ELEMICA integration on both ends. This represents the ultimate in process optimization.

Data transfer without any detours. Error-free, time-saving and easy.

Order placement, order confirmation, shipping confirmation, the booking of incoming goods and invoicing – are all generated, transmitted and recorded automatically. Subsequent changes and cancellations are also sent quickly, reliably and error-free. This reduces the processing effort and saves a considerable amount of time.

ELEMICA BUYER DIRECT. YOUR DIRECT LINK TO US.

As an ELEMICA member, you can be assured of decisive benefits even without entirely automating your order processing. The “Buyer Direct” communications solution enables you to selectively optimize your order process and make it much more efficient.

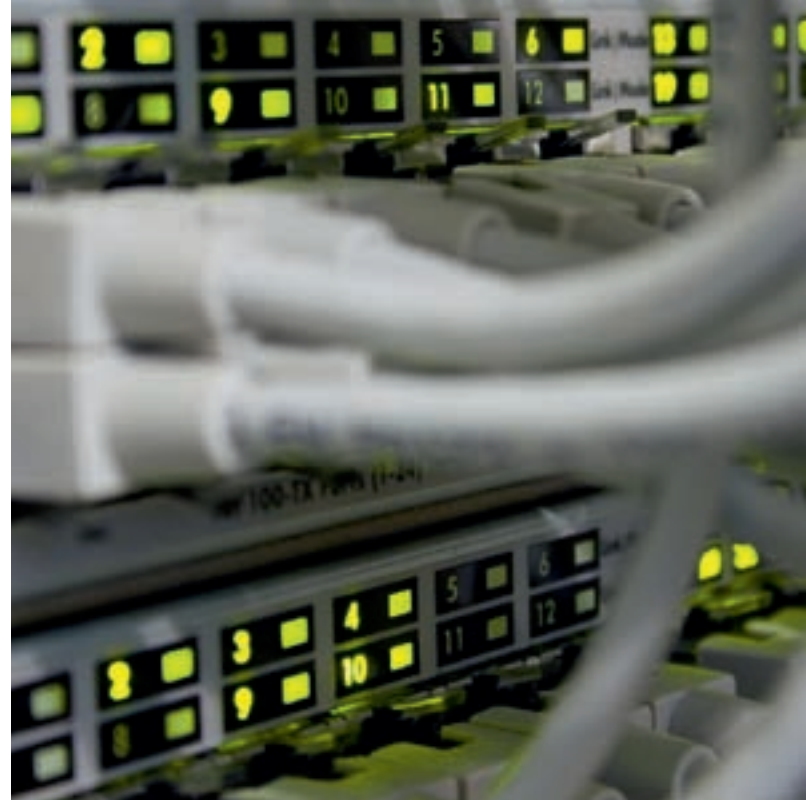

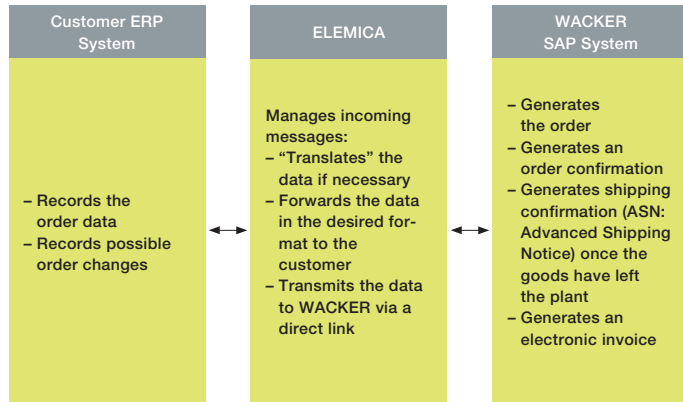

Conveniently order. Neatly and securely.

Your ERP system automatically transmits the recorded order data to WACKER’s SAP system via ELEMICA. Plus, you can be certain that everything is received without error.

Acknowledgement via email. Quick and reliable.

WACKER then provides you with authenticated acknowledgements via email, e.g. an order confirmation whose data you can enter manually into your ERP system. In addition, you receive a digitally signed invoice in convenient PDF format via email.

ELEMICA EDI SOLUTION. ELEMICA SPEAKS YOUR LANGUAGE.

With ELEMICA's EDI solution, you can reap the many benefits of paperless order processing even without being an ELEMICA member. You send your data in the desired format to ELEMICA. ELEMICA translates the data and ensures that everyone receives the required information in the preferred format. This way, your ERP system and WACKER's SAP system communicate efficiently with each other.

Make use of the automation advantages. In your language.

The data interchange is carried out in the EDI format that you prefer. This makes it possible to automatically read messages from different ERP systems and prepare the messages for further processing.

Optimize communication channels. Save time and money.

EDI circumvents postal delivery times and manual errors. Orders, order changes and cancellations are received by WACKER immediately, reliably and free of errors. In return, you receive authenticated acknowledgements, e.g. an order confirmation with status, shipping confirmation (ASN: Advanced Shipment Notice) or invoice. Quickly and reliably.

Order processing is ideally suited to electronic data interchange. WACKER's ELEMICA solutions help you to automate your processes and reap the benefits.

Your advantages at a glance:

- Time flexibility for order placement
- Immediate order confirmation
- No unnecessary manual work such as printing, faxing, etc.
- Reduced processing effort
- Fewer errors affecting orders, credit notes, invoices, deliveries, etc.
- Dependable transmission of order changes and cancellations
- Optimum availability
- Current status information
- Maximum transparency
- Better utilization of your own ERP system
- Lower costs

Reap the benefits. Talk to us. We will gladly advise you!
