

# BELSIL<sup>®</sup> DM 3200 E

## Silicone Fluid Emulsions

BELSIL<sup>®</sup> DM 3200 E is an anionic emulsion of a dimethiconol fluid. BELSIL<sup>®</sup> DM 3200 E represents a new technology, enabling emulsions of high molecular weight dimethiconol fluids with a very low particle size of < 160 nm combined with a low level of cyclic silicone by-products D4, D5, D6 <0.1%. The high molecular weight dimethiconol fluid is formed in-situ during the emulsification process. The formation of cyclic silicones is efficiently suppressed due to the selected emulsifier system.

INCI Dimethiconol, TEA-C8-10 Alkyl Phosphate, Laureth-23

## Properties

BELSIL<sup>®</sup> DM 3200 E is an effective conditioning agent for hair care products. The emulsion supports to leave hair silky and smooth after shampooing and to improve wet and dry combability.

## Technical data

### General Characteristics

Property	Condition	Value	Method
pH	-	6.5 - 8.5	-
Emulsifier type	-	anionic	-
Active content approx.	-	36 %	-
Appearance	-	milky	-
Particle size	-	< 160 nm	-

All the information provided is in accordance with the present state of our knowledge. Nonetheless, we disclaim any warranty or liability whatsoever and reserve the right, at any time, to effect technical alterations. The information provided, as well as the product's fitness for an intended application, should be checked by the buyer in preliminary trials. Contractual terms and conditions always take precedence. This disclaimer of warranty and liability also applies particularly in foreign countries with respect to third parties' rights.

Protect against frost.

## Applications

- Conditioners
- Hair Care
- Shampoos

## Application details

BELSIL® DM 3200 E is an excellent conditioning additive, especially when formulated into shampoo. It can also be used in rinse-off conditioners, leave-in conditioners and styling applications.

Processing:

Recommended use levels of BELSIL® DM 3200 E in shampoo, conditioning and styling are 2 - 6 %.

The emulsion needs to be stirred well before use.

## Packaging and storage

### Storage

Minimum temperature allowed during storage and transportation: 0 °C

The 'Best use before end' date of each batch is shown on the product label. Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.
