

SILFOAM[®] SH

Silicone Antifoam Compound

SILFOAM[®] SH is an anhydrous antifoam compound, which is used in several different industrial applications.

Properties

SILFOAM[®] SH was conceived for different technical applications, e. g., for the biotechnological industry. SILFOAM[®] SH is also an effective degassing aid to reduce the foam formation in the production and processing of paints. Furthermore SILFOAM[®] SH is an effective degassing aid for PVC pastes and casting resins.

Technical data

General Characteristics

Property	Condition	Value	Method
Active content	-	100 %	-
Appearance	-	colorless, slightly cloudy	-
Density	20 °C	approx. 1 g/cm ³	DIN 51757
Viscosity, dynamic	25 °C	2000 - 20000 mPa·s	Brookfield

All the information provided is in accordance with the present state of our knowledge. Nonetheless, we disclaim any warranty or liability whatsoever and reserve the right, at any time, to effect technical alterations. The information provided, as well as the product's fitness for an intended application, should be checked by the buyer in preliminary trials. Contractual terms and conditions always take precedence. This disclaimer of warranty and liability also applies particularly in foreign countries with respect to third parties' rights.

Applications

- Antifoams

Packaging and storage

Storage

The 'Best use before end' date of each batch is shown on the product label. Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.

Safety notes

Comprehensive instructions are given in the corresponding Material Safety Data Sheets. They are available on request from WACKER subsidiaries or may be printed via WACKER web site <http://www.wacker.com>.
