

# SILRES® POWDER G

## Silane Powders

SILRES® POWDER G is a water repellent in powder form for gypsum and construction material mixes containing gypsum. It must be thoroughly mixed with the gypsum before water is added. Good water repellency is obtained by adding 0.5 to 2.0% by weight powder, based on the dry weight of the gypsum. The exact amount depends on the type of gypsum and quantity of mixing water.

## Technical data

### General Characteristics

Property	Condition	Value	Method
Appearance	-	off-white	ASTM D 412
Bulk density	-	350 - 450 kg/m <sup>3</sup>	-

All the information provided is in accordance with the present state of our knowledge. Nonetheless, we disclaim any warranty or liability whatsoever and reserve the right, at any time, to effect technical alterations. The information provided, as well as the product's fitness for an intended application, should be checked by the buyer in preliminary trials. Contractual terms and conditions always take precedence. This disclaimer of warranty and liability also applies particularly in foreign countries with respect to third parties' rights.

## Applications

- Wall and Joint Fillers

## Packaging and storage

### Storage

SILRES® POWDER G must be stored in the tightly closed original container under exclusion of moisture.

The "Best use before end" date of each batch is shown on the product label. Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.

### Safety notes

Comprehensive instructions are given in the corresponding Material Safety Data Sheets. They are available on request from WACKER subsidiaries or may be printed via WACKER web site <http://www.wacker.com>.
