Application details

BELSIL® PDM 1000 is used in all kinds of cosmetics formulations, but mostly in Hair Care compositions and Color Cosmetic due to their shine-enhancing benefits. BELSIL® PDM 1000 reduces the stickiness of formulations containing acrylic acid polymers. It is an excellent emollient in skincare products, imparts a very pleasant feel to the skin, and provides water-repellency.

In antiperspirant formulations, phenyl-modified silicones are employed as a refractive-index match to promote the formation of clear products.
