VINNAPAS® 8034 H

Dispersible Polymer Powders

VINNAPAS® 8034 H is a very strong hydrophobic dispersible polymer powder for dry mix mortars, specifically suited for tile grouts, renders and plasters, Skim Coats. It is based on a flexible terpolymer of vinyl chloride, ethylene and vinyl laurate. VINNAPAS® 8034 H belongs to the product class VINNAPAS® H which means that it provides a remarkable hydrophobic effect in addition to adhesion.

Properties

- VINNAPAS® 8034 H is a hydrophobic, terpolymer powder of ethylene, vinyl laurate and vinyl chloride.
- It is dispersible in water. VINNAPAS® 8034 H performs as binder and hydrophobizing agent.
- When blended with inorganic binders, the resin will provide improved adhesion, flexural strength, deformability and abrasion resistance and are easier to process.
- Due to the hydrophobizing resin’s special composition and production method, compounds modified with VINNAPAS® 8034 H will have extensive and lasting water repellency on alkaline building materials and significantly reduced water absorption.
- VINNAPAS® 8034 H contains a fine mineral filler as an antiblocking agent. It is produced without the use of organic solvents, plasticizers and film-forming agents.
- VINNAPAS® 8034 H is highly hydrophobizing, has no effect on rheological properties and is a hydrophobizing powder in the lower Tg range. It is suitable for formulating compounds that must exhibit good very good water repellency. Optimum water repellency is obtained at a pH > 7.5.

All the information provided is in accordance with the present state of our knowledge. Nonetheless, we disclaim any warranty or liability whatsoever and reserve the right, at any time, to effect technical alterations. The information provided, as well as the product’s fitness for an intended application, should be checked by the buyer in preliminary trials. Contractual terms and conditions always take precedence. This disclaimer of warranty and liability also applies particularly in foreign countries with respect to third parties’ rights.

Applications

- Tile Grouts
- Mineral Renders & Plasters
- Skim Coat
- Adhesive and Embedding Mortars

Application details

For typical application fields of VINNAPAS® 8034 H, refer to the section *application*. Please discuss additional applications with your WACKER customer representative.

Processing

For the production of ready-mixed dry mortars, such as adhesives and patching compounds, blend VINNAPAS® 8034 H with the other dry ingredients in appropriate equipment. Temperatures should not be allowed to rise excessively during mixing because otherwise the dispersible polymer powder could agglomerate by virtue of its thermoplastic properties. The mortar is prepared for use by adding the recommended amount of water and mixing mechanically or by hand. Since hand mixing generates little shear force, we recommend allowing the fresh mortar to slake for 5 minutes and then stirring it again. This is usually unnecessary where mechanical mixers are employed.
Additional information

If the product is used in applications other than those mentioned, the choice, processing and use of it is the sole responsibility of the purchaser. All legal and other regulations must be complied with.
Slight color variations of the dispersible polymer powder may occur without impairing the product’s functionality.

Packaging and storage

Packaging
25 kg paper bags Big Bags or bulk on request.

Storage
During storage, protect VINNAPAS® 8034 H from contact with moisture. Prolonged storage at temperatures above 30 °C, including in combination with pressure load, humidity or exposure to sunlight, may result in blocking. Carefully seal any open containers and store them in suitable conditions. We recommend storing VINNAPAS® 8034 H in a warehouse that provides cool and dry conditions. Do not store VINNAPAS® 8034 H for more than six months, starting from the point at which it was received. If the product is kept for longer than that, it can still be used, but users are advised, in this case, to check the properties required for the intended use.

Safety notes

Comprehensive instructions are given in the corresponding Material Safety Data Sheets. These are available on request from WACKER sales offices or may be downloaded from the WACKER Web site www.wacker.com/vinnapas.
