

# BELSIL<sup>®</sup> DM 1000000

## Silicone Fluids (INCI)

BELSIL<sup>®</sup> DM 1000000 is a linear, non-reactive, unmodified polydimethylsiloxane. It is a dimethicone with a viscosity of 1000000 mm<sup>2</sup>/s. BELSIL<sup>®</sup> DM 1000000 is characterized by low surface tension and high spreading coefficient. Due to its flexible polymer backbone, this dimethicone has high permeability to gases (e.g. water, vapour, oxygen), which allows respiration of the skin.

### INCI Dimethicone

R = Me

## Technical data

### General Characteristics

Property	Condition	Value	Method
Appearance	-	colorless, clear	-
Density	25 °C	approx. 0.97 g/cm <sup>3</sup>	DIN 51757
Flash point	-	> 320 °C	ISO 2592
INCI name	-	Dimethicone	-
Ignition temperature	-	450 °C	DIN 51794
Refractive index	25 °C	1.4037	-
Surface tension	25 °C	0.022 N/m	-
Viscosity, kinematic	25 °C	approx. 1000000 mm <sup>2</sup> /s	DIN 53019

All the information provided is in accordance with the present state of our knowledge. Nonetheless, we disclaim any warranty or liability whatsoever and reserve the right, at any time, to effect technical alterations. The information provided, as well as the product's fitness for an intended application, should be checked by the buyer in preliminary trials. Contractual terms and conditions always take precedence. This disclaimer of warranty and liability also applies particularly in foreign countries with respect to third parties' rights.

## Applications

- Conditioners
- Hair Care
- Hair Styling
- Lip Make-up
- Make-up Foundation
- Shampoos
- Skin Care
- Sun Care

## Application details

High-viscous BELSIL® DM 1000000 is widely used in a diverse range of personal-care formulations. Dimethicones provide a hydrophobic, protective, but breathable barrier for the skin, imparting softness and emolliency. They improve the water resistance of various products, such as sun screens. Simultaneously, they prevent stickiness in skin-care as well as in color-cosmetics formulations. In hair-care products, high-viscous dimethicones are among the most commonly used conditioning additives. They improve both wet and dry combability, impart humidity resistance and a soft feel to the hair, and enhance shine.

## Packaging and storage

### Storage

Maximum temperature allowed during storage and transportation: 50 °C

The "Best use before end" date of each batch is shown on the product label. Storage beyond the date specified on the label does not necessarily mean that the product is no longer usable. In this case however, the properties required for the intended use must be checked for quality assurance reasons.

### Safety notes

Comprehensive instructions are given in the corresponding Material Safety Data Sheets. They are available on request from WACKER subsidiaries or may be printed via WACKER web site <http://www.wacker.com>.
