

BELSIL[®] eco DM 50

Silicone Fluids (INCI)

BELSIL[®] eco DM 50 is a linear, non-reactive, unmodified polydimethylsiloxane, based on renewable raw materials according to "TÜV NORD Standard REDcert²". BELSIL[®] eco DM 50 is characterized by low surface tension and a high spreading coefficient. Due to their flexible polymer backbone, dimethicones have high permeability to gases (e.g. water vapor, oxygen), which allows respiration of the skin.

INCI Dimethicone

Technical data

General Characteristics

Property	Condition	Value	Method
Aggregate state	-	liquid	-
Appearance	-	colorless,clear	-
Density	25 °C	0.96 g/cm ³	-
Flash point	-	> 250 °C	ISO 2592
INCI name	-	Dimethicone	-
Refractive index	25 °C	1.402	-
Surface tension	-	approx. 0.021 N/m	-
Viscosity, dynamic	25 °C	50 mPa·s	DIN 53019
Viscosity, kinematic	25 °C	approx. 50 mm ² /s	DIN 53019

Nonetheless, we disclaim any warranty or liability whatsoever and reserve the right, at any time, to effect technical alterations. The information provided, as well as the product's fitness for an intended application, should be checked by the buyer in preliminary trials. Contractual terms and conditions always take precedence. This disclaimer of warranty and liability also applies particularly in foreign countries with respect to third parties' rights.

Applications

- Skin Care
- Sun Care

Application details

BELSIL® eco DM 50 is widely used in a highly varied range of personal-care formulations. Formulations with BELSIL® eco DM 50 have better spreading properties and can be easily distributed on the skin. In these formulations, it imparts a hydrophobic, protective but breathable barrier to the skin, simultaneously minimizing stickiness. It reduces whitening and imparts a soft emolliency to the skin.
